

## **Comfort Air**

### **“We’re here for your comfort”**

### **Stop problems before they start!**

One of the best ways to avoid problems with your home comfort equipment is to prevent them from occurring. Even the best equipment, if not maintained properly, can malfunction. Proper care can keep your furnace and air-conditioning running efficiently each season and helps you avoid costly repairs.

The manufacture of your system requires scheduling regular maintenance to avoid many creating cooling problems. It will help by cutting down on your energy bills, expensive service calls and the replacement of the equipment.

## **Cost Saving Ideas!**

Programmable/ Wi-Fi Thermostats can make a big difference in energy consumption. Programmable thermostats are used to achieve temperatures throughout your home based on your desires through the day. For example, if you are gone during certain times of the day, you can set your thermostat at a more energy efficient level to avoid heating or cooling an empty house.

Wi-Fi thermostats gives you the convenience of being able to set the thermostat from anywhere on your smartphone, tablet or computer. This helps give you the peace of mind that your system is running and functioning properly while you are away.

### Humidifiers:

Too little moisture inside your home can cause skin irritation, sore throats and respiratory problems. Humidified air feels warmer causing the unit to run less and it helps reduce occurrences of dry skin, chapped lips and static shocks. Proper moisture levels also help to lower the risk of respiratory infections and illnesses as well as preventing damage to wood in floors, trim, and furnishing when they become too dry.

### Zoning:

Zoning provides consistent comfort throughout your home and can drastically lower your heating costs. Zoning divides your home into separate comfort areas, which are heated or cooled based on your needs. you wont have to heat the whole house just to make one room comfortable.

### High efficiency systems:

If you're in the market for a new furnace or air-conditioner, consider purchasing a high efficiency model. the can help reduce your energy costs as well as conserve out natural resources. Please call us today for a FREE estimate or to schedule any of our services.
